My Experiences

EDE Trainer Team

EDE Laboratory is a research lab for Telkom's students in doing research, projects, and developing in the field of data. As a trainer staff, I'm responsible for ensuring the development of each member. I teach on a routine class, prepare modules, mentor on projects, etc.

Daspro Laboratory - Algoritma & Pemrograman

As the assistant we assist in building the module that includes the lesson plan, yet hands-on. Besides that we also teach regularly and always ensure the practitioners development.

EIM Research & Project Team

EIM Laboratory is a research lab for Telkom's students in doing research, projects, and developing in the field of computers. Especially, networks; cloud computing; cybersecurity; and DevOps. As the staff of the research & project division I was assigned to the "Belajar Bersama Research" program. My responsibility is to make weekly classes so all of the members are able to develop their basic technical computer skills.
